## Army leader tastes what's cookin' at Natick

Soldiers are eating better with help from new technologies. That was the message Army scientists delivered to the Army's civilian leader during a visit to research and development facilities here March 15.

Secretary of the Army John McHugh listened to U.S. Army Research, Development and Engineering Command's Soldier systems center representatives discuss new advances in food technology.

## Eat Up!: Feed the troops

Michelle Richardson and other food scientists at an Army research lab in Natick, Mass., ensure that the vitamins, minerals and calories in each ration meet the required levels in MREs for Soldiers.

## NSSC Town Hall

The April 5 town hall is going to be a little different from other Natick Soldier Systems Center town halls. This one will give all installation personnel the opportunity to view the newly updated installation master plan and participate in a question and answer forum.

## Army, Apple meet to discuss hand-held solutions for Soldiers

Leaders from the Army's technology command visited Apple, Inc. here to discuss the use of Apple products in Army business and battlefield operations.

Maj. Gen. Nick Justice, Research, Development and Engineering Command commanding general and key members of his staff traveled to Apple headquarters March recently.

## Installation residents receiving census survey forms

Soldiers and family members living on military installations can expect to receive the 2010 U.S Census Survey by April 15.

Residents of group quarters - such as barracks, guest housing and military treatment facilities - will have their surveys delivered by Department of Defense personnel working in conjunction with the U.S. Census Bureau. Those living in family housing will receive their surveys in the mail. People living overseas will not receive the survey. Instead, the Defense Manpower Data Center will provide the bureau with their statistical data based on a person's home of record.
